

KYLE ANDERSON

(480) 434-4675

Software / Data Engineer

kyle@divspace.com

25 years experience in software development and IT operation with a focus on backend PHP development.

PROFESSIONAL EXPERIENCE

Software Engineer

May 2022 - now()

Bisnow - Scottsdale, AZ

- › Implement robust ETL processes for incoming data, ensuring its quality and consistency.
- › Collaborate closely with cross-functional teams to understand data requirements and develop efficient solutions for importing data into the company's systems.
- › Actively participate in data quality assurance initiatives, identifying and resolving issues to maintain high data integrity standards.

Backend Developer

June 2020 - May 2022

Grand Canyon Education - Phoenix, AZ

- › Collaborated with various departments in development of new and existing web services, server rendered pages, functional test sites, and deploying software and configuration.
- › Built robust and scalable software in PHP, MySQL, Laravel, Symfony, WordPress, and Drupal.
- › Designed and created local Docker development system and CI/CD pipelines using Azure DevOps.

Director of Technology

October 2018 - July 2019

Fulcrum Digital - Jersey City, NJ

- › Managed global teams for Apria Healthcare to provide code review, coding standards, linting, continuous integration and deployment (CI/CD), systems administration, technology stack configuration and versioning, database normalization and mapping, and documentation.
- › Provided sprint planning, grooming, and retrospectives, daily standups, weekly individual and team/department check-ins from developers, product owners, customers, and various leadership.

Senior Software Engineer

August 2017 - October 2018

Apria Healthcare - Chandler, AZ

- › Populated and maintained data from various sources to destinations based on business requirements.
- › Performed as Scrum Master and managed sprint planning, stories, and retrospectives for local and remote development teams and third-party vendors.
- › Coordinated with the product owners, legal, finance, and other teams on infrastructure and security, optimization, audits, and testing to increase application performance and user experience.

Application Architect

September 2014 - August 2017

Freelance - Scottsdale, AZ

- › Worked with various companies throughout the Phoenix area—such as Media Solutions, Moses, and Privoro—providing planning and assistance with new and/or existing codebases built with Laravel and related technologies in the ecosystem.

Co-Founder

May 2006 - August 2014

Crucial Hosting - Queen Creek, AZ

- › Established and managed daily business aspects, from infrastructure development and maintenance to customer acquisition, web design and development, and technical support.
- › Grew Crucial into \$1MM+ in annual revenues through targeted marketing, consistent infrastructure modernization, and providing outstanding user experiences.
- › Wrote blog and knowledgebase articles to help clients and increase online presence, earning placement in search and industry publications, such as *Smashing Magazine* and *A List Apart*.
- › Established Crucial as the industry's most prominent hosting provider for Magento, serving as a technical product expert and benchmark for performance and optimization.

IT Manager

August 2001 - May 2002

B&D Litho - Phoenix, AZ

- › Reduced accounting department's efforts by allowing employees in satellite offices to connect directly to the Phoenix office via VPN to clock in and out and directly access the mainframe.
- › Provided general technical support, such as wiring buildings with CAT5, rebuilding computers, and fixing common software and hardware issues.
