Seasoned IT professional with 25 years of experience in software development and IT operations.

Recognized for expertise in backend development, data engineering, and leadership roles.

Committed to leveraging technology to drive business growth and optimize operational efficiency.

PROFESSIONAL EXPERIENCE

Software Engineer
May 2022 – May 2024

Bisnow / BisCRED – Scottsdale, AZ

- Spearheaded the design and implementation of robust ETL processes, ensuring high data quality and consistency across the organization.

- Provided strategic leadership in collaborating with cross-functional teams to analyze data requirements and develop efficient solutions for data integration.

- Directed data quality assurance initiatives, overseeing the identification and resolution of issues to maintain stringent data integrity standards.

Backend Developer
June 2020 – May 2022

Grand Canyon Education – Phoenix, AZ

- Orchestrated the development of new and existing web services, server-rendered pages, and functional test sites, aligning with organizational objectives.

- Led the creation of scalable software solutions in PHP, MySQL, Laravel, Symfony, WordPress, and Drupal, driving innovation and efficiency.

- Designed and implemented local Docker development systems and CI/CD pipelines using Azure DevOps, optimizing development workflows and deployment processes.

Director of Technology
October 2018 – July 2019

Fulcrum Digital – Jersey City, NJ

- › Managed global teams for Apria Healthcare, providing strategic oversight in code review, CI/CD implementation, and technology stack configuration.

- › Facilitated agile ceremonies, including sprint planning, grooming, and retrospectives, fostering collaboration and alignment across teams.

- › Advised executive leadership on technology initiatives, aligning IT strategies with organizational goals and driving digital transformation.

Senior Software Engineer
August 2017 – October 2018

Apria Healthcare – Chandler, AZ

- › Acted as Scrum Master, overseeing sprint planning, stories, and retrospectives for local and remote development teams and third-party vendors.

- › Collaborated with stakeholders to optimize infrastructure, security, and application performance, ensuring alignment with business objectives.

- › Provided technical leadership in data management and governance, ensuring compliance with regulatory standards and best practices.

Application Architect
September 2014 – August 2017

Freelance – Scottsdale, AZ

- › Provided strategic planning and technical guidance to various companies, optimizing codebases built with Laravel and related technologies.

- › Advised clients on architecture design and scalability, driving innovation and efficiency in software development projects.

- › Demonstrated expertise in leveraging emerging technologies to solve complex business challenges, delivering high-impact solutions.
